

Reinventing Corporate America One Board at a Time

## ALLIANCE PARTNERSHIP

Program Leaders hold the position that it is important for mainstream national diversity advocacy organizations to work together with one strong voice in advocating a Main Street approach to introduce the kind of inclusive, quality governance necessary to improve corporate governance. We believe the best way to accomplish this is to promote the concept of balance in the boardroom that tempers the profit factor with factoring investment and social responsibility considerations into governance policies.

By aligning with Boardroom Bound, the following member organizations have become part of our rapidly growing Pipeline Network since it provides a powerful benefit for their members. These organizations are feeders for our Boardology™ Institute where we provide the kind of training and education necessary to pre-qualify their members for our Talent Pipeline Delivery System that companies can tap for pre-qualified, diverse director candidates.
